TRANSPORTABLE HF WELDING MACHINE

THIS MINI WELDING MACHINE IS USED FOR MANY APPLICATIONS:

Office Automation:

- For welding badges, pass cards.

Medical chemistry:

- For welding infected objects or in the contrary to avoid their infection after sterilization: pharmacy, surgery, nuclear, agro-chemistry...
- For welding bags after operation

Food shops:

- For making blister packs (cakes, fruits, ready cooks dishes) because staples are forbidden.

Hypermarkets:

- To repair broken blister packs in the shop or to make blister packs for small ranges.

Laboratories:

- For welding tests
- Prototypes
- To repair leaks, tyre valves, eyelets.

MECHANICAL PRESS:

- Adjustable and reversible Electrode
Lg = 150mm
- Press Stroke: 15 mm.
- Swan-neck: 70 mm.

REMOTE CLAMPS:

Ref: PSM-S-pince T

Price: on request

Ref: PSM-S-pince I

Price: on request

Ref: PSM-S-1000

Price: on request

Sizes: Height: 300
Weidth: 300
Length: 600

Weight: 19 kg.

ELECTRICAL CHARACTERISTICS:

- HF power on electrode: 500W_{HF}
(10cm²)
- Supply: 230 single phase & ground
(1000VA)
- Ammeter: anode current
- Welding Timer
- Safety commands: handle lever & push button
